| Question <br> number | Ans | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i )}$ | D | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i i )}$ | $16.0(\mathrm{~m} / \mathrm{s})$ read from graph (1) <br> Substitution (1) <br> (distance travelled =) $16 \times 0.5$ <br> Answer (1) <br> $8.0(\mathrm{~m})(1)$ | award full marks for <br> correct numerical answer <br> without working <br> ecf for substitution and <br> answer using wrong <br> speed value | (3) |

| Question <br> number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i i i )}$ | A | (1) |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i v ) ~}$ | Obtain readings from graph (1) <br>  <br>  <br>  <br> Substitution (1) <br> $\frac{16}{2.0}$ <br> Answer (1) <br> $8.0\left(\mathrm{~m} / \mathrm{s}^{2}\right)$award full marks for <br> correct numerical answer <br> without working |  |  |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 1(b) | Any three improvements from: <br> - suitable instrument to <br> measure distance (1) <br> using a greater distance <br> (to reduce effect of reaction <br> times) (1) <br> suitable instrument to <br> measure time (1) <br> use of one student at the <br> \{first/second\} lamp post to <br> signal when to \{start/stop <br> timing (1) | allow tape measure, <br> trundle wheel | allow stop watch/clock <br> or timing app. on phone |

|  | two of three sets of students <br> taking readings for the same <br> car (1) |  |  |
| :--- | :--- | :--- | :--- |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2(a) | rearrangement (1) <br> $m=\frac{f}{a}$ | substitution and conversion (1) <br> $m=\frac{1870}{1.83}$ <br> answer and rounding to 3 s.f. (1) <br> 1020 (kg) | maximum 2 marks if kN <br> not converted to N <br> award full marks for <br> correct numerical <br> answer without working |

| Question <br> number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 2(b) | rearrangement of $\frac{(v-u)}{t}=a(1)$ <br> $v=u+a t$ <br> substitution (1) <br> $v=0+1.83 \times 16$ <br> answer (1) <br> $29.3(\mathrm{~m} / \mathrm{s})$ | award full marks for <br> correct numerical <br> answer without working | (3) |

| Question <br> number | Indicative content | Mark |
| :--- | :--- | :--- |
| *9(c) | Answers will be credited according to candidate's deployment of <br> knowledge and understanding of the material in relation to the <br> qualities and skills outlined in the generic mark scheme. <br> The indicative content below is not prescriptive and candidates <br> are not required to include all the material which is indicated as <br> relevant. Additional content included in the response must be <br> scientific and relevant. | AO2 <br> fuel forms a store of chemical (potential) energy <br> chemical energy is transferred to kinetic energy and <br> thermal energy when the car moves <br> kinetic energy transferred to thermal energy as the car <br> slows down |
| AO3 <br> during X, kinetic energy increases as the car's speed <br> increases/car accelerates and the increase in kinetic energy <br> is provided by the chemical energy store <br> during all three sections, work is done against frictional <br> forces in the moving parts of the car and against the drag <br> from the air <br> during Y, kinetic energy stays constant when the car moves <br> at constant speed but energy is still transferred to thermal <br> energy <br> during Z, kinetic energy decreases as the car slows down | (6) |  |

| Level | Mark | Descriptor |
| :--- | :--- | :--- |
|  | 0 | No awardable content. |
| 1 | $1-2$ | Interpretation and evaluation of the information attempted but <br> will be limited with a focus on mainly just one variable. <br> Demonstrates limited synthesis of understanding. (AO3) <br> The description attempts to link and apply knowledge and <br> understanding of scientific ideas, flawed or simplistic <br> connections made between elements in the context of the <br> question. (AO2) |
| 2 | $3-4$ | Interpretation and evaluation of the information on both <br> variables, synthesising mostly relevant understanding. (AO3) <br> The description is mostly supported through linkage and <br> application of knowledge and understanding of scientific ideas, <br> some logical connections made between elements in the <br> context of the question. (AO2) |

| 3 | 5-6 | Interpretation and evaluation of the information, <br> demonstrating throughout the skills of synthesising relevant <br> understanding. (AO3) |
| :--- | :--- | :--- |
| The description is supported throughout by linkage and <br> application of knowledge and understanding of scientific ideas, <br> logical connections made between elements in the context of <br> the question. (AO2) |  |  |
