# A-level BIOLOGY

Paper 1

#### Time allowed: 2 hours

#### Materials

For this paper you must have:

- a ruler with millimetre measurements
- a scientific calculator.

#### Instructions

- Use black ink or black ball-point pen.
- Fill in the boxes at the top of this page.
- Answer all questions.
- You must answer the questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Show all your working.
- Do all rough work in this book. Cross through any work you do not want to be marked.

#### Information

- The marks for the questions are shown in brackets.
- The maximum mark for this paper is 91.

| For Examiner's Use |      |  |

**0 1**. **4** The scientists used this equation to calculate the plant species index of diversity.

$$d = 1 - \sum \left(\frac{n}{N}\right)^2$$

where n = shoot biomass of each plant species and N = total shoot biomass of all plant species

Use this equation to calculate the index of diversity for the data in **Table 1**.
