

**GCSE (9–1)**

**Combined Science A (Physics) A (Gateway  
Science)**

**J250/11: Paper 11 (Higher Tier)**

General Certificate of Secondary Education

**Mark Scheme for June 2019**

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2019

Annotations available in RM Assessor

Annotation	Meaning
	Correct response
	Incorrect response
	Omission mark
	Benefit of doubt given
	Contradiction
	Rounding error
	Error in number of significant figures
	Error carried forward
	Level 1
	Level 2
	Level 3
	Benefit of doubt not given
	Noted but no credit given
	Ignore

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

<b>Annotation</b>	<b>Meaning</b>
/	alternative and acceptable answers for the same marking point
✓	Separates marking points
<b>DO NOT ALLOW</b>	Answers which are not worthy of credit
<b>IGNORE</b>	Statements which are irrelevant
<b>ALLOW</b>	Answers that can be accepted
( )	Words which are not essential to gain credit
—	Underlined words must be present in answer to score a mark
<b>ECF</b>	Error carried forward
<b>AW</b>	Alternative wording
<b>ORA</b>	Or reverse argument

**Subject-specific Marking Instructions****INTRODUCTION**

Your first task as an Examiner is to become thoroughly familiar with the material on which the examination depends. This material includes:

- the specification, especially the assessment objectives
- the question paper
- the mark scheme.

You should ensure that you have copies of these materials.

You should ensure also that you are familiar with the administrative procedures related to the marking process. These are set out in the OCR booklet **Instructions for Examiners**. If you are examining for the first time, please read carefully **Appendix 5 Introduction to Script Marking: Notes for New Examiners**.

Please ask for help or guidance whenever you need it. Your first point of contact is your Team Leader.

The breakdown of Assessment Objectives for GCSE (9-1) in Combined Science A:

	<b>Assessment Objective</b>
<b>AO1</b>	<b>Demonstrate knowledge and understanding of scientific ideas and scientific techniques and procedures.</b>
AO1.1	Demonstrate knowledge and understanding of scientific ideas.
AO1.2	Demonstrate knowledge and understanding of scientific techniques and procedures.
<b>AO2</b>	<b>Apply knowledge and understanding of scientific ideas and scientific enquiry, techniques and procedures.</b>
AO2.1	Apply knowledge and understanding of scientific ideas.
AO2.2	Apply knowledge and understanding of scientific enquiry, techniques and procedures.
<b>AO3</b>	<b>Analyse information and ideas to interpret and evaluate, make judgements and draw conclusions and develop and improve experimental procedures.</b>
<b>AO3.1</b>	Analyse information and ideas to interpret and evaluate.
AO3.1a	Analyse information and ideas to interpret.
AO3.1b	Analyse information and ideas to evaluate.
<b>AO3.2</b>	Analyse information and ideas to make judgements and draw conclusions.
AO3.2a	Analyse information and ideas to make judgements.
AO3.2b	Analyse information and ideas to draw conclusions.
<b>AO3.3</b>	Analyse information and ideas to develop and improve experimental procedures.
AO3.3a	Analyse information and ideas to develop experimental procedures.
AO3.3b	Analyse information and ideas to improve experimental procedures.

For answers to section A if an answer box is blank ALLOW correct indication of answer e.g. circled or underlined.

Question	Answer	Marks	AO element	Guidance
1	D	1	1.1	
2	D	1	2.1	
3	A	1	1.1	
4	D	1	1.2	
5	A	1	2.1	
6	B	1	1.1	
7	B	1	1.1	
8	B	1	2.1	
9	D	1	2.1	
10	B	1	2.1	

Question		Answer	Marks	AO element	Guidance
11	(a)	<p>Connect one terminal of cell/battery to <b>A</b> / AW ✓  <b>BUT</b>  Lamp only lights if <b>A</b> is connected to positive (terminal) ✓✓</p> <p>Connect other terminal of cell/battery to <b>B</b> / AW ✓</p>	3	3×3.3a	<p><b>IGNORE</b> lamps does not light if <b>B</b> is connected to positive (terminal)</p> <p><b>ALLOW</b> idea of putting cell/battery between <b>A</b> and <b>B</b> in words or drawn on the diagram ✓✓</p> <p><b>ALLOW</b> add a cell/battery (to the series circuit) if no other mark awarded</p>
	(b)	(i)	2	2×1.1	<p>p.d. and voltage are interchangeable throughout this question but ignore references to resistance</p> <p><b>ALLOW</b> gradient changes / gradient not constant  <b>ALLOW</b> graph does <b>not</b> obey Ohm's Law  <b>ALLOW</b> the graph is a curve  <b>ALLOW</b> (p.d and current) <b>not</b> proportional</p> <p><b>BUT</b> (p.d and current) <b>not</b> directly proportional ✓✓</p> <p><b>ALLOW</b> the current only flows in one/positive direction</p> <p><b>ALLOW</b> the current increases after 0.5 (V)  <b>IGNORE</b> just 'it' begins at 0.5 (V)</p>

	(ii)	<p><b>FIRST CHECK THE ANSWER ON ANSWER LINE</b>  <b>If answer = 40 (<math>\Omega</math>) award 4 marks</b></p> <p>(R =) p.d <math>\div</math> Current <math>\checkmark</math></p> <p>From graph, (I =) 0.02 (A) <math>\checkmark</math></p> <p>0.8 / 0.02 <math>\checkmark</math></p> <p>= 40 (<math>\Omega</math>) <math>\checkmark</math></p>	4		<p><b>1.2</b> <b>ALLOW</b> 0.8 <math>\div</math> current</p> <p><b>2.2</b> <b>ALLOW</b> answer from graph in region 0.017 (A) to 0.023 (A)</p> <p><b>2.1</b> <b>ALLOW</b> ecf from candidate's reading for current from graph</p> <p><b>2.1</b> If reading of current from 0.017 (A) to 0.023 (A) then allow answer from 34.78 (<math>\Omega</math>) to 47.06 (<math>\Omega</math>) for 4 marks                      e.g. a current of 0.018 gives the answer of 44.4 (<math>\Omega</math>)</p>
	(c)	<p><b>Any two from:</b></p> <p>Current becomes (too) large/increases (too much) <math>\checkmark</math></p> <p>Resistance of diode decreases (rapidly) <math>\checkmark</math></p> <p>Diode can be damaged/blow/break <math>\checkmark</math></p>	2	2x3.2b	<p><b>ALLOW</b> any answer that implies the current has increased e.g. current would be too high/too much  <b>IGNORE</b> too strong</p> <p><b>ALLOW</b> the diode can explode / overheat / AW  <b>IGNORE</b> it would be dangerous / heat up / blows the circuit / damages the circuit / just diode stops / short circuit / breaks the circuit / blows the fuse</p>
	(d)	<p>Graph starting at 0 with positive and decreasing slope <math>\checkmark</math></p>	1	1.2	 <p><b>IGNORE</b> initial straight line / leveling off / any part of the graph outside the axes</p>

Question		Answer	Marks	AO element	Guidance
12	(a)	(i)	3		<b>ALLOW</b> higher level answers involving $\rho_1 V_1 = \rho_2 V_2$
		<b>FIRST CHECK THE ANSWER ON ANSWER LINE</b> <b>If answer = 2 (g/cm<sup>3</sup>) award 3 marks</b>			
		Mass of (each) cube is $16 \times 1 = 16$ (g) ✓ Volume of <b>B</b> is $2^3 = 8$ (cm <sup>3</sup> ) ✓ $= 2$ (g / cm <sup>3</sup> ) ✓ <b>OR</b> Volume of <b>B</b> is $8 \times$ volume of <b>A</b> ✓ Density of <b>B</b> is $1/8 \times$ density of <b>A</b> = $16 / (2^3)$ ✓ $= 2$ (g / cm <sup>3</sup> ) ✓		2x2.1  1x1.2  OR 2x2.1  1x1.2	<b>IGNORE</b> $16 \div 1 = 16$ (g) <b>ALLOW</b> $2 \times 2 \times 2 = 8$ (cm <sup>3</sup> )
		(ii)	1	1x1.1	<b>ALLOW</b> density of cube/metal/ <b>A</b> is greater (than 1) / more dense / higher density <b>IGNORE</b> it has a greater density than cube <b>B</b>
	(b)	(i)	2	2x1.2	<b>ALLOW</b> higher level answers involving weight of the spring in addition to weight of cube  <b>IGNORE</b> weight / gravity  Pull or force must be present in the answer for the mark to be awarded

		(ii)	Forces are equal (and opposite) / force up = force down / force of cube = force of support / AW ✓	1	1.1	<b>ALLOW</b> forces are balanced / in equilibrium / forces cancel out  <b>IGNORE</b> references to Newton's Third Law
		(iii)	The spring accelerates ✓	1	1.1	<b>ALLOW</b> spring moves (in the direction of the force) / falls / position changes  <b>IGNORE</b> references to the spring changing shape / spring deforms / stretching or not stretching / unbalanced force / constant velocity
		(iv)	<b>FIRST CHECK THE ANSWER ON ANSWER LINE</b> <b>If answer = 1.2 (N) award 3 marks</b>  (F =) kx ✓  F = 30 × 0.04 ✓  = 1.2 (N) ✓	3	1.2  2.1  2.1	<b>ALLOW</b> correct equation in words or symbols

Question			Answer	Marks	AO element	Guidance
13	(a)	(i)	<p>Yes <b>AND</b> gives a correct stated trend shown by the data to support the conclusion ✓</p> <p><b>OR</b></p> <p>No <b>AND</b> gives a correct stated trend shown by the data to support the conclusion ✓</p>	1	3.1b	<p>Examples of the trend shown by the data: the 10 turns picks up less than the 50 turns 10 turns attracts 1 pin but 50 attracts 4 pins a stronger magnetic field means more pins attracted as coils increase so does number of pins attracted as the turns increase so do the number of pins</p> <p><b>IGNORE</b> just part of the trend e.g. when there were 50 coils it picked up 4 pins</p> <p>Examples of the trend shown by the data: when turns increase 20 to 40 then 2 pins attract when the current is 0.25 (A) there is no difference between 20 and 30 turns</p> <p><b>IGNORE</b> just part of the trend e.g. when there were 20 coils it picked up 2 pins</p>
		(ii)	Lower current (has less heating effect) / less power required / AW	1	3.2a	<p><b>ALLOW</b> uses less amps</p> <p><b>IGNORE</b> less energy / stronger (magnetic field) / quicker / more reliable</p>
	(b)	(i)	<p>Clockwise</p> <p><b>AND</b></p> <p>(Fleming's) left hand rule ✓</p>	1	1.2	<p><b>BOTH</b> needed for mark</p> <p><b>IGNORE</b> upwards / downwards / right</p> <p><b>IGNORE</b> other names</p>

		(ii) <b>FIRST CHECK THE ANSWER ON ANSWER LINE</b> <b>If answer = <math>1.2 \times 10^{-3}</math> (N) award 4 marks</b>	<b>4</b>		
		(F =) BIL ✓		<b>1.2</b>	<b>ALLOW</b> correct equation in words or symbols
		(Length in field = 3 cm =) 0.03 (m) ✓		<b>1.2</b>	<b>DO NOT ALLOW</b> 0.03 (m) + another length e.g. 0.03 (m) + 0.02 (m)
		$F = 0.08 \times 0.5 \times 0.03$ ✓		<b>2.1</b>	<b>ALLOW</b> (ecf for using cm) $0.08 \times 0.5 \times 3$ ✓✓
		$= 1.2 \times 10^{-3}$ (N) ✓		<b>2.1</b>	<b>ALLOW</b> (ecf for using cm) 0.12 ✓✓✓

Question		Answer	Marks	AO element	Guidance
14	(a)	<p>Evidence for use of area under line / distance = area under v-t graph / Area <math>\approx 62 \times 20 = 1240</math> m ✓</p> <p><b>BUT</b> Total distance = <math>1240 + 750 = 1990</math> (m) ✓✓</p>	2	2×1.2	<p><b>ALLOW</b> area from 1200 to 1240 (m) <b>DO NOT ALLOW</b> a calculation of <math>62 \times 40</math> on its own or 2480 on its own</p> <p><b>ALLOW</b> total distance calculated from 1950 to 1990 (m) ✓✓</p> <p><b>DO NOT ALLOW</b> answer of (approximately) 2000 with no workings</p>
	(b)	<p><b>FIRST CHECK THE ANSWER ON ANSWER LINE</b> <b>If answer = 50 (m/s) award 3 marks</b></p> <p>(speed =) distance travelled / time taken ✓</p> <p>(s =) <math>2000 / 40</math> ✓</p> <p>= <math>50</math> (m / s) ✓</p>	3	<p>1.2</p> <p>2.1</p> <p>2.1</p>	<p><b>ALLOW</b> the candidate's value of distance from (a): If value from (a) is 1990 then answer is 49.75 or 49.7 or 49.8 or 50 (m / s) ✓✓✓✓ If value from (a) is 1950 then answer is 48.75 or 48.8 (m / s) ✓✓✓✓</p>

Question		Answer	Marks	AO element	Guidance
15	(a)	<p>multiply mass by acceleration due to gravity / <math>(F =) mg</math> ✓</p> <p><b>BUT</b>  <math>(W =) 0.4 \times 10</math> or <math>4(N)</math> ✓✓</p>	2	1.1  1.2	<b>ALLOW</b> $(F =) ma$
	(b)	<p><math>(s = d/t)</math> gives speed at <b>X and Y</b> obtained ✓</p> <p><b>BUT</b>            acceleration = change in velocity or speed <math>\div</math> time /  <math>(a =) [v - u] \div t</math> ✓✓</p>	2	3.3a  1.1	Must be idea of obtaining two velocities or speeds e.g. the final velocity and the initial velocity / minus initial velocity squared from final velocity squared / measure the change in velocity
	(c)	<p><b>Any one from:</b>            place surface at an angle /use incline ✓</p> <p>use an air track/oil ✓</p> <p>increase the width of <b>X</b> and <b>Y</b> ✓</p> <p>accurately weigh masses before use ✓</p> <p>make sure masses are uniform ✓</p>	1	3.3b	<p><b>ALLOW</b> use smoother surfaces /do it on a frictionless surface / airline (track)</p> <p><b>IGNORE</b> use more light gates / repeat / find a mean</p>

Question			Answer	Marks	AO element	Guidance
15	(d)	*	<p>Please refer to the marking instructions on page 4 of this mark scheme for guidance on how to mark this question.</p> <p><b>Level 3 (5-6 marks)</b> Describes and explains in detail what the results show and evaluates the validity of the results.</p> <p><i>There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated.</i></p> <p><b>Level 2 (3–4 marks)</b> Describes and explains what the results show and comments on the validity of the results.</p> <p><b>OR</b> Describes and explains in detail what the results show.</p> <p><i>There is a line of reasoning presented with some structure. The information presented is relevant and supported by some evidence.</i></p> <p><b>Level 1 (1–2 marks)</b> Basic description or explanation of what the results show.</p> <p><b>OR</b> Comments on the validity of the results.</p> <p><i>There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant.</i></p> <p><b>0 marks</b> <i>No response or no response worthy of credit.</i></p>	6	3×2.2 3×3.2b	<p><b>AO2.2 Applies knowledge and understanding of force and acceleration</b></p> <ul style="list-style-type: none"> <li>as force increases, acceleration increases / there is a positive correlation</li> <li>line of best fit shows force is directly proportional to acceleration</li> <li>doubling the force, doubles the acceleration / AW</li> <li>linear relationship through 0</li> </ul> <p><b>AO3.2b Analyses information and ideas to draw conclusions about the graph</b></p> <ul style="list-style-type: none"> <li>results suggests not proportional/not linear</li> <li>line of best fit is poorly drawn / does not go through majority of points</li> <li>actual line of best fit is <b>not</b> through 0</li> <li>poor validity as points not close to line of best fit / points are scattered</li> <li><b>not</b> enough results / <b>no</b> evidence of repeated results</li> </ul> <p><b>IGNORE</b> general statement e.g. the results are inconsistent / some results are wrong / there is an anomaly</p>

Question			Answer	Marks	AO element	Guidance
15	(e)	(i)	<p><b>FIRST CHECK THE ANSWER ON ANSWER LINE</b>  <b>If answer = 0.98 (per kg) award 2 marks</b></p> <p>(Gradient =) <math>5 / 5.1</math> ✓</p> <p>= 0.98 (per kg) ✓</p>	2	2×2.1	<p><b>ALLOW</b> correct use of any correct triangle on graph, provided it covers a force greater than 1 (N) and an acceleration greater than 1 (m/s<sup>2</sup>)</p> <p><b>ALLOW</b> answer in range of 0.96 to 1 (per kg)</p>
		(ii)	<p>Identifies intercept as - 0.8 ✓</p> <p><math>y = 0.98x - 0.8</math> ✓</p>	2	2×2.1	<p><b>ALLOW ECF</b> from part (i), i.e. <math>y = \text{gradient} \times \text{their intercept}</math> if clear or - 0.8 e.g.            If answer to part (i) is 1            then <math>y = x - 0.8</math> or <math>y = 1x - 0.8</math> ✓✓</p> <p><b>ALLOW</b> <math>a = 0.98f - 0.8</math> ✓✓</p>
